

# Colby Components

---

## Powder Handling

“Colby can provide the right powder handling components to suit your application and your business.”

**Application**

Colby understands the requirements of powder processing. We can help with components or integrated systems for powder handling.

**Sanitary Design**

Colby has the expertise to provide components designed to meet the strictest sanitary standard. Included in these designs are quick release clamps and hand demountable fittings.

**Reliability**

Colby components are built to last. Solid designs are used and we construct only from quality materials.

**Service & Spares**

We can service and provide spares for our components, worldwide. Colby has fast effective backup with timely delivery via your preferred method.

Colby can provide	
Rotary Valves	Diverter Valves
Bin Activators	Silo Fluidisers
Dust Filters	Bag Dumps
