

Weigh Feeders

CWF

Colby

“High quality, purpose built, loss-in-weight feeding systems.”

Application Engineering

Our CWF series weigh feeders have been developed from our years of experience in powder handling systems. Colby knows how to apply this process knowledge to achieve the best end result for our customers.

CWF-6

Sanitary Design

Colby understands food processing environments. This knowledge is demonstrated in our product cleanability and sanitary designs. Where possible we include quick release clamps and hand demountable fittings with FDA approved materials to provide a sanitary feeding solution.

Reliability

Colby components are built to last. Solid designs are used. We construct only from quality materials and source subcomponents from recognised manufacturers.

Service & Spares

We can service and provide spares for our components, worldwide. Colby has fast effective backup with timely delivery via your preferred method.

Industries Served

- Dairy
- Beverage
- Pharmaceuticals
- Baby Foods
- Nutritional
- Ingredients
- Cereals

CWF Range

- CWF-2 (up to 50 mm Auger)
- CWF-4 (100 mm Auger)
- CWF-6 (150 mm Auger)
- CWF-8 (200 mm Auger)

Options available include:

- Auger shut off valve
- Infeed hopper configuration
- Variable frame heights
- Auger types
- Continuous or batching outfeed
- ATEX
- USDA
- Profibus/devicenet comms
- Stand alone controls
